## Strong to Severe Storms Possible This Afternoon and Evening

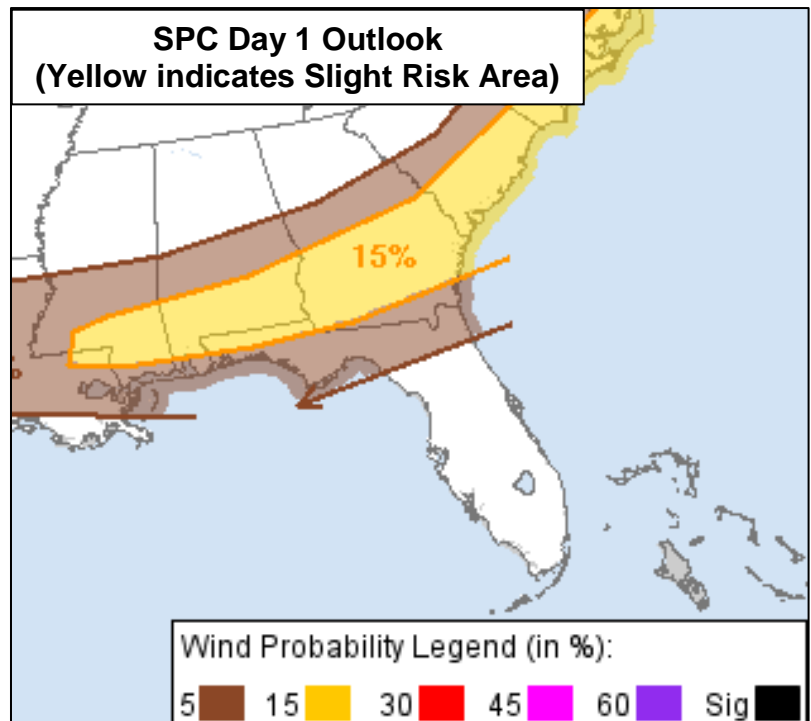

### Event:

**Type** – Strong to severe thunderstorms

**Timing** – After 2 pm ET and continuing through early evening

### **Overview -**

A cold front will move into the Southeast on Monday afternoon. A hot and unstable airmass ahead of this front will be conducive for the development of scattered showers and thunderstorms. The cold front will help organize these storms into several clusters or lines of storms that could be strong to severe in the afternoon and evening hours.

### **Simulated Radar for July 28th**

### Impacts:

- The main threats from these storms will be damaging winds in excess of 60 mph. Some large hail is possible as well.
- Winds of this intensity will likely result in numerous downed trees and power lines. Minor structural damage is possible only in the strongest storms.
